

# Universität Basel

## Masterstudium: Sustainable Development

The aim of the MSD study program:

Our students gain advanced knowledge about scientific aspects of Sustainable Development in consideration of the ecological responsibility, the societal solidarity and the economic performance. They are taught to become competent and interdisciplinary working decision-makers in science, politics, economics, and society. Our graduates are able to consider, manage and implement complex sustainability issues.

Academic degree:

Master of Science in Sustainable Development

Structure:

The MSD study program contains 120 credit points, which are acquired over four semesters in the case of a full time study. For a part time study, the duration will extend accordingly. The MSD offers three focus areas: in natural sciences, in social sciences, and in economics; each containing six determined modules.

For detailed information regarding modules etc. we recommend to have a closer look at the study regulations (in German) and the guidelines, the medium-term syllabus and the optimal study progression plan (all available in English). These documents and a graphic representation of the three focus areas can be downloaded from our website: <https://www.msd.unibas.ch/en/services/downloads/msd-2017/>

Head of the MSD:

The study program is jointly run by the Faculty of Sciences, the Faculty of Humanities and Social Sciences and the Faculty of Business and Economics of the University of Basel.

Until July 2020 the teaching committee (TC) is chaired by Prof. Dr. Frank Krysiak, Dep. of Resource Economics, Faculty of Economics. Vice chair is Prof. Dr. Paul Burger, head of the Sustainability Research Group, Department of Social Sciences, Faculty of Humanities and Social Sciences.

The coordination office of the MSD is managed by Camelia Chebbi, for contact details see academic advice.

Further information:

The guidelines and the study regulations inform about admission criteria, the registration process and the curriculum.

The detailed course directory (dcd) informs regarding teaching program of the current semester. Further information are provided by the medium-term syllabus (mittelfristiger Lehrplan). For the preparation of the timetable the detailed course directory (dcd) and the medium-term syllabus have to be considered.

All documents are available as downloads: <https://www.msd.unibas.ch/en/services/downloads/msd-2017/>

Studienfachberatung:

For academic advice and information please contact Camelia Chebbi, MA/MAS ETHZ/MAS NPPM FHNW, head coordination office MSD: coordination-msd@unibas.ch; +41/61/207 04 20.

The coordination office MSD is located at Vesaligasse 1/2nd floor, CH-4051 Basel.

For short consultation the coordination office MSD is open on Monday, Tuesday, and Thursday: 09.30 - 11.30 a.m.

Individual study counseling on request.

### Modul: Komplementärer Basisbereich Naturwissenschaften

50260-01	Vorlesung: Ecology and Evolution	1 KP
Dozierende	Jan Beck	
Zeit und Ort	Mi 16:15-18:00 Vesalianum, Seminarräum (O2.02) Class starts on 26.02.20 and takes place fortnightly (see details on "dates and rooms").	
Datum	26.02.2020	
Intervall	14-täglich	
Angebotsmuster	Jedes Frühjahrsemester.	
Anbietende Organisationseinheit	Departement Umweltwissenschaften	
Module	Modul Aufbaubereich naturwissenschaftliche Fragen von Nachhaltigkeit (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul: Komplementärer Basisbereich Naturwissenschaften (Masterstudium: Sustainable Development)	
Lernziele	You will understand the scientific basis of ecological and evolutionary theory, which is a precondition to understand many applied issues in conservation, ecosystem management, agricultural sciences and other topics of human-environment relationships.	
Inhalt	The course will provide you with sound background knowledge in ecology and evolutionary biology. While I will primarily treat basic science topics and principles in these fields, the topics were also chosen for their relevance for applied sciences such as conservation, agro-sciences and ecosystem management. We will treat the basics of evolutionary theory (e.g., common descent, natural selection, reproductive isolation and speciation), the genetic basis of evolution (e.g., mutation and recombination, selfish genes), and examples of human impact on evolution. The ecology part introduces basic concepts such as population growth, interspecific interactions, and the patterns of primary productivity and their consequences	

(among others). We will also look in detail at the geographic ranges of species and resulting emergent phenomena, such as biodiversity. A global perspective on the human impact on biodiversity, and its feedback on human economy, will put this into applied perspective.

#### Literatur

Recommended textbooks:

- Biogeography, 4th ed., by Mark V. Lomolino, Brett R. Riddle, and Robert J. Whittaker; Oxford University Press.
- Ecology: From Individuals to Ecosystems, 4th ed., by Michael Begon, Colin R. Townsend, John L. Harper; Wiley-Blackwell
- Evolution, 3rd ed. by Mark Ridley; Wiley-Blackwell.
- The selfish gene by Richard Dawkins, Oxford University Press.
- Collapse: how societies choose to fail or survive by Jared Diamond; Penguin Books.

All books are available at Basel university library.

Additional journal article links or PDFs will be made available during the course (via ADAM).

Englisch

Participation only possible for MSD students (incl. preparation semester) and students who are studying a master's degree in the field of Natural Sciences.

MSD 2017

Mandatory for students with focus area in social sciences and in economics, transfer of CP to another module is not possible.

For students with focus area in natural sciences the lecture is optional, credit points are to be transferred to the "Focal Areas in Sustainability Research" module (learning agreement).

This lecture is offered by MSD. Dr. J. Beck holds a teaching assignment. For more information on Jan Beck see: <https://orcid.org/0000-0003-1170-4751>

36792-01	Vorlesung: Terrestrial ecosystem ecology and sustainable land use	2 KP
<b>Dozierende</b>	<b>Ansgar Kahmen</b>	
<b>Zeit und Ort</b>	Do 14:15-16:00 Botanik, Hörsaal 00.003	
<b>Datum</b>	20.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	Jedes Frühjahrsem.	
<b>Anbietende Organisationseinheit</b>	Integrative Biologie	
<b>Module</b>	Lehrveranstaltungen Masterstudium Pflanzenwissenschaften (Masterstudium: Pflanzenwissenschaften) Lehrveranstaltungen Masterstudium Ökologie (Masterstudium: Ökologie) Modul Biologie 5 (Bachelorstudium: Biologie (Studienbeginn vor 01.08.2013)) Modul Wahlbereich Energie und Klimawandel (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul: Biologie 5 (Bachelorstudium: Biologie) Modul: Komplementärer Basisbereich Naturwissenschaften (Masterstudium: Sustainable Development)	
<b>Lernziele</b>	You learn about: - the concept of ecosystem goods and services and the multifunctionality of land use - key processes determining energy, carbon nitrogen and water cycling in ecosystems - the impacts of global environmental changes on biogeochemical cycles - the role of biodiversity for ecosystem functioning - strategies for the sustainable use of ecosystem goods and services	
<b>Inhalt</b>	Terrestrial ecosystems deliver ecosystem goods (food, timber, fuel) and services (carbon sequestration, nutrient cycling, water purification) that we as people depend on. The delivery of these ecosystem goods and services is tightly coupled to biogeochemical cycles that determine the fluxes of carbon, water or nutrients in ecosystems. In «Terrestrial ecosystem ecology and sustainable land use» we will present the key mechanisms that drive biogeochemical cycles in terrestrial ecosystems from leaf to globe. We will explain the impact	

of global environmental change (climate change, nitrogen deposition, loss of biodiversity, land use changes) on biogeochemical cycles and ecosystem services and will discuss sustainable management strategies that can mitigate these impacts. In essence, this class will teach the ecological principles that underlie the sustainable use of natural and agricultural ecosystems.

40076-01	Vorlesung mit Übungen: Technical Basis of Generation, Distribution and Storage of Energy	3 KP
<b>Dozierende</b>	<b>Wolfgang Hoffelner</b>	
<b>Zeit und Ort</b>	Mi 10:15-12:00 Vesalianum, Seminarräum (O2.02) First teaching day: 26.02.2020!	
<b>Datum</b>	26.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	Jedes Frühjahrsemester	
<b>Anbietende Organisationseinheit</b>	Departement Umweltwissenschaften	
<b>Module</b>	Modul Grundlagenbereich Naturwissenschaften (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul: Komplementärer Basisbereich Naturwissenschaften (Masterstudium: Sustainable Development)	
<b>Lernziele</b>	Students <ul style="list-style-type: none"> <li>- know the technical/scientific background behind the various methods and plants for energy production;</li> <li>- know the technical/scientific background of future energy systems (production, distribution, storage, recovery);</li> <li>- are able to judge about advantages and limitations of future energy concepts;</li> <li>- are able to judge about future national and international energy concepts and scenarii.</li> </ul>	
<b>Inhalt</b>	Current discussions concerning scenarii for production and use of energy as well as the development of future energy strategies require knowledge about the basis of the different energy systems. During the lecture the students will get a deeper understanding of technical, physical and chemical backgrounds behind various kinds of energy as well its production technologies. The variety of future machines, plants and options for communication require also knowledge about energy storage and energy distribution. Recovery of energy, which is based on the conversion of energy, is a basic element in energy saving and needs understanding of physical-chemical processes. The lecture shall enable students to objective and critical discussions concerning the complex concepts of future energy matters. In addition to the local Swiss requirements also the global dimension of energy will be considered. Possible discussion points are: <ul style="list-style-type: none"> <li>- Basis of Energy Systems</li> <li>- Traditional Energy Production</li> <li>- Renewable Energies</li> <li>- Energy Storage and Recovery</li> </ul>	

- Smart Grids
- Mobility, etc.

<b>Literatur</b>	Literature will be given throughout the semester.

	This lecture is offered by MSD. Dr. Wolfgang Hoffelner holds a teaching assignment.

#### Modul: Komplementärer Basisbereich Gesellschaftswissenschaften

17403-01	Seminar: Governance, Sustainable Development and Democracy	3 KP
<b>Dozierende</b>	<b>Rony Emmenegger</b>	
<b>Zeit und Ort</b>	Mi 12:15-14:00 Rosshofgasse (Schnitz), Seminarraum S 01 First teaching day: 26.02.2020!	
<b>Datum</b>	26.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	Jedes Frühjahrsem.	
<b>Anbietende Organisationseinheit</b>	Fachbereich Nachhaltigkeitsforschung	
<b>Module</b>	Modul Aufbaubereich gesellschaftswissenschaftliche Fragen von Nachhaltigkeit (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul Kernbereich Gesellschaftswissenschaftliche Nachhaltigkeitsforschung (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul: Kernbereich Gesellschaftswissenschaften (Masterstudium: Sustainable Development) Modul: Komplementärer Basisbereich Gesellschaftswissenschaften (Masterstudium: Sustainable Development) Vertiefungsmodul Global Europe: Umwelt und Nachhaltigkeit (Masterstudium: European Global Studies) Modul: Fields: Governance and Politics (MSG - African Studies) Modul: Resources and Sustainability (MSG - Changing Societies: Migration – Conflicts – Resources)	
<b>Lernziele</b>	The participants - are familiar with the concepts 'governance', 'sustainable development' and 'democracy', they understand the interrelations and tensions between them; - have acquired basic theoretical, methodological and empirical knowledge and skills necessary to produce critically reflected scientific analyses of governance for sustainable development within various policy fields and political contexts.	
<b>Inhalt</b>	Against the backdrop of persistent problems of unsustainability, there is a lively debate both in politics and in science on how to govern societies towards more sustainable pathways. In conceptual terms this debate increasingly builds on the notion of 'governance' which highlights both theoretical limits to classical models of political steering and the empirical insight that governments are not the only relevant actors when it comes to the management of societal issues. Instead, at least within the context of modern democracies, the contested, interdependent and dynamic nature of contemporary policymaking has given rise to less hierarchical but more collaborative and polycentric forms of governance. Accordingly, for theoretical and empirical reasons, the governance of modern societies is more and more	

understood as a shared responsibility of the state, the market and the civil society.

This 'new governance complexity' is assumed to entail potentials and threats for sustainable development and democracy throwing up some fundamental questions regarding the relationship between all three concepts: How can societies be governed towards sustainable development in a democratic way? What are the normative and functional requirements of sustainability governance in democratic societies? What are the empirical conditions as well as prospects and barriers of democratic forms of governance for sustainable development within various political contexts? And, what are the implications of environmental change for the ways governance and democracy can be organized at and across spatial and temporal scales?

The seminar addresses the relationship between governance, sustainable development and democracy in theoretical and empirical respects. First, it will lay a theoretical fundament by introducing the concepts of governance, sustainable development and democracy. Second, specific approaches of governance for sustainable development will be critically discussed particularly with regard to their democratic implications. Third, a number of case studies of sustainability governance in different fields will provide an opportunity to analyze the democratic problem-solving capacity of different governance arrangements in various contexts. Finally, further theoretical and practical perspectives of democratic governance for sustainable development are sketched out.

**Teilnahmevoraussetzungen**

Special course application required for ALL (for details see "course application" or "Anmeldung"). Limited number of participants (25), students of the MSD, IJDSD and the listed programs (see list of modules) have priority. If you study something different you must do a master's degree within the 'Faculty of Humanities and Social Sciences' and may attend the seminar in case of vacancies.

Additional entry requirements for participants who do not study the MSD or IJDSD:  
They must have passed successfully one of the following lectures or a similar one (= credit points already acquired) during a former semester:

- 11513: Sustainability: A new Societal Paradigm?
- 11508: Grundkurs I: Kultur- und sozialwissenschaftliche Grundlagen der Nachhaltigkeit;
- 12882: Grundkurs III: Grundlagenreflexion der Nachhaltigkeitswissenschaft;
- 41829: Perspectives of Social Sciences on Sustainability;
- or something similar to prove evidence of knowledge regarding sustainable development and/or democracy.

**Anmeldung zur Lehrveranstaltung**

Mandatory application for ALL: Link for application open from 15.01.20/noon - 05.02.20/midnight:

[https://adam.unibas.ch/goto\\_adam\\_fold\\_744950.html](https://adam.unibas.ch/goto_adam_fold_744950.html)

(Login on top row right hand side of ADAM website. The link is open as soon as the application form is online).

NOTE: Be aware of special entry requirements. Course inscription via MOnA remains mandatory.

In case of vacancies the mandatory online application link remains open incl. the second week of teaching + 2 days.

Please note entry requirements and mandatory course application procedure (additional to registration on MOnA).

**MSD 2017**

Mandatory for students with focus area in natural sciences and in economics.

For students with focus area in social sciences this seminar is optional for the "Core Competences in Social Sciences" module. They may transfer the credit points to the "Focal Areas in Sustainability Research" module (learning agreement).

**MSD 2010**  
 Anrechnung gemäss Modulpublikationen oder für den Vertiefungsbereich Phil.-Hist. (learning contract).

The seminar is offered by MSD. Dr. Rony Emmenegger is a post doc staff member of the Sustainability Research Group at Unibas and holds a teaching assignment.

11513-01	Vorlesung mit Übungen: Sustainability: A new Societal Paradigm?	3 KP
<b>Dozierende</b>	<b>Paul Burger</b>	
<b>Zeit und Ort</b>	Mi 08:15-09:45 Kollegienhaus, Hörsaal 115 Start of teaching: 26.02.20	
<b>Datum</b>	26.02.2020

<b>Angebotsmuster</b>	Jedes Frühjahrsem.	
<b>Anbietende Organisationseinheit</b>	Fachbereich Nachhaltigkeitsforschung	
<b>Module</b>	Modul Aufbaubereich gesellschaftswissenschaftliche Fragen von Nachhaltigkeit (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul Kernbereich Gesellschaftswissenschaftliche Nachhaltigkeitsforschung (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul: Kernbereich Gesellschaftswissenschaften (Masterstudium: Sustainable Development) Modul: Komplementärer Basisbereich Gesellschaftswissenschaften (Masterstudium: Sustainable Development) Vertiefungsmodul Global Europe: Umwelt und Nachhaltigkeit (Masterstudium: European Global Studies) Modul: Resources and Sustainability (MSG - Changing Societies: Migration – Conflicts – Resources)	
<b>Lernziele</b>	The students - understand 'sustainable development' as a new alternative role model within the global societal development discourse; - know important theoretical social sciences based approaches to analyze sustainability issues and to conceptualize the role model.	
<b>Inhalt</b>	Sustainable Development has become more and more influential since the famous Brundtland-report in shaping political, economic or individual decisions. However, it has also become a buzzword with many different meanings serving many different interests. Moreover, there are quite controversial theoretical approaches for conceptualizing sustainable development across different disciplines. Against this backdrop, this lecture provides a social science oriented basis for - understanding sustainable development as a new societal role model for human development; - conceptualizing sustainable development based on justice. Literature tba during lecture.

50768-01	Kolloquium: Methods in Economics: Survey Data Collection and Analytics	3 KP
<b>Dozierende</b>	<b>Aya Kachi</b>	
<b>Zeit und Ort</b>	Do 10:15-14:00 Wirtschaftswissenschaftliche Fakultät	
<b>Datum</b>	20.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	Jedes Frühjahrsemester.	
<b>Anbietende Organisationseinheit</b>	Wirtschaftswissenschaftliche Fakultät / WWZ	
<b>Module</b>	Modul: Interdisziplinäre Forschung zu Nachhaltigkeit (Masterstudium: Sustainable Development)	
<b>Lernziele</b>	1. learn survey and survey experiment methods from an applied, practical point of view, 2. learn how to use them in research.	
<b>Inhalt</b>	This course is part of the full module "Colloquium: Survey Research Methodology (6KP)". In order to master fully the entire research process involving a survey and a survey experiment, it is strongly recommended that you sign up for the 6KP full module. In case you sign up for this 3KP module, the following will more or less what you will learn.	
	The course is intended as an applied method colloquium taught at the master's level. The course welcomes motivated students who are willing to complete required readings beforehand, and discuss and participate actively in class with your peer. Creativity in thinking is always a little bit of a plus for survey- and survey-experiment oriented research. This partial module aims to prepare you for understanding good research involving a survey and a survey experiment. The course covers three major areas: (1) the nature of the survey response, including the typical psychology of attitude expressions and social desirability pressures; (2) general issues around quantitative survey research, including random and systematic	

measurement errors, and the logic of causal analysis; and (3) analyzing and interpreting treatment effects (for survey experiments) using an existing (but not your own) survey experiment data. The topical area covered in this colloquium is mostly within the realm of climate- and energy-related policy issues; however, this should not prevent you from learning survey research methodology, even if your research interests were in other topical areas such as marketing and international trade. We will use R for quantitative analyses. Energy and Climate Policy—Citizens' Perspectives (VV-Nr: 43030) is not a strict requirement but highly recommended before taking this course. Basic knowledge of sampling and statistics would be useful. The final grade will be based on active participation, homework assignments and a final examination.

The largest difference from the full (6KP) version "Colloquium: Survey Research Methodology" is the following. In the full module, during the latter half of the colloquium, we, collectively as a class, will draft an original survey experiment together, and field it with a convenience sample (i.e. "real people"). In doing so, in the full module, we will learn and use Qualtrics as a survey software (which we will explore together in the course). Instead of the final examination, in the full module, each of us will write a short research note based on our original survey data, analyzing "real" results. Therefore, the full module would take a more thorough learning-by-doing style, including technical implementation of a survey, as well as thorough discussions on decisions regarding survey wording etc. Needless to say, one would also learn (by doing), what to illustrate in the final report.

Required readings will be available on ADAM

Semesterendprüfung

1-6 0,1

keine Wiederholungsprüfung

Belegen via MOnA innerhalb der Belegfrist

(1)Occasional individual or group assignments related to survey design. (2) Active participation in class. (3) Final examination. The final grade will be the sum of all these activities.

Energy and Climate Policy—Citizens' Perspectives (VV-Nr: 43030) is not a strict requirement but highly recommended before taking this course. Alternatively, some experience (courses) and knowledge about public opinion or survey-based market research can be helpful. Basic knowledge of sampling and statistics would be useful. Basic knowledge of R is also useful.

Registration: Please enrol in MOnA. EUCOR-Students and students of other Swiss Universities have to enrol at the students administration office (studseksupport1@unibas.ch) within the official enrolment period. Enrolment = Registration for the exam!

52317-01	Kolloquium: Presentation of Concepts of MSD Master's Thesis	1 KP
<b>Dozierende</b>	Paul Burger Patricia Holm <b>Frank Christian Krysiak</b>	
<b>Datum</b>	24.02.2020	
<b>Intervall</b>	unregelmässig	
<b>Angebotsmuster</b>	Jedes Semester	
<b>Anbietende Organisationseinheit</b>	Departement Umweltwissenschaften	
<b>Module</b>	Modul: Interdisziplinäre Forschung zu Nachhaltigkeit (Masterstudium: Sustainable Development)	
<b>Lernziele</b>	Participants learn - to present research questions and a research concept to an interdisciplinary audience; - to place their research questions in an appropriate sustainability context; - to discuss research questions and concepts from other disciplines; - to provide constructive feedback to their fellow students.	
<b>Inhalt</b>	Within the study program of MSD 2017, students have to register 3 times in a 'master's thesis colloquium'. This colloquium is the second one (= colloquium B). The participants present the research questions and the research design used in their master's theses. They prepare their presentations in a way that is accessible to an interdisciplinary audience, focus on the relation of their research questions to sustainable development and the fit between these questions and the research design.	
<b>Leistungsüberprüfung</b>	Lehrveranst.-begleitend	

<b>Skala</b>	Pass / Fail
<b>Wiederholungsprüfung</b>	keine Wiederholungsprüfung
<b>An-/Abmeldung zur Prüfung</b>	An-/Abmelden: Belegen resp. Stornieren der Belegung via MOnA
<b>Hinweise zur Leistungsüberprüfung</b>	Regular attendance. Oral presentation of 10 minutes, followed by a discussion of 15 minutes.
<b>Belegen bei Nichtbestehen</b>	beliebig wiederholbar
<b>Einsatz digitaler Medien</b>	kein spezifischer Einsatz
<b>Unterrichtssprache</b>	Englisch
<b>Teilnahmevoraussetzungen</b>	Only for students of the MSD 2017. The application concerning the "master's thesis" has already been approved by the teaching committee.
<b>Anmeldung zur Lehrveranstaltung</b>	Students have to register for a presentation on doodle: <a href="https://doodle.com/poll/gi3m2s83ytybyqgg">https://doodle.com/poll/gi3m2s83ytybyqgg</a> Presentation time slots according to announcements. Registration on MOnA remains mandatory.
<b>Bemerkungen</b>	Schedule spring semester 2020 tba. Meeting 1: ttmmjj/hh to hh; Meeting 2: ttmmjj/hh to hh; Meeting 3: ttmmjj/hh to hh;

Duration depends on the number of presentations.

This course is offered by MSD. The professors - Patricia Holm, Paul Burger and Frank Krysiak (lead) are heading the MSD teaching committee.

53982-01	Kolloquium: Presentation of Results of MSD Master's Thesis	1 KP
<b>Dozierende</b>	Paul Burger Patricia Holm <b>Frank Christian Krysiak</b>	
<b>Zeit und Ort</b>	schedule tba	
<b>Datum</b>	24.02.2020	
<b>Intervall</b>	unregelmässig

56830-01	Kolloquium: Sozialforschung und Methodologie	2 KP
<b>Dozierende</b>	<b>Manfred Max Bergman</b>	
<b>Zeit und Ort</b>	Mi 18:15-20:00 Soziologie, Hörsaal 215	
<b>Datum</b>	26.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	einmalig	
<b>Anbietende Organisationseinheit</b>	Fachbereich Soziologie	
<b>Module</b>	Modul: Interdisziplinäre Forschung zu Nachhaltigkeit (Masterstudium: Sustainable Development) Modul: Methoden der Gesellschaftswissenschaften (Masterstudium: European Global Studies) Modul: Politik, Entwicklung und soziale Ungleichheit (BSF - Soziologie) Modul: Wirtschaft, Wissen und Kultur (BSF - Soziologie) Modul: Methoden der Near & Middle Eastern Studies und der Gesellschaftswissenschaften (MSF - Near & Middle Eastern Studies) Modul: Ungleichheit, Konflikt, Kultur (MSF - Soziologie)	
<b>Lernziele</b>	Participants will - expand their competences in assessing scientific work and research - learn how to critique scientific work constructively - be exposed to multidisciplinary and transdisciplinary research	
	Die Teilnehmenden haben - ihre Kompetenzen für wissenschaftliches Arbeiten und Forschen vertieft, - gelernt, konstruktive Kritik zu üben. - multidisziplinäre und transdisziplinäre Forschungsansätze verstanden. - ihren wissenschaftlichen Horizont zur empirischen Sozialforschung erweitert.	
<b>Inhalt</b>	The colloquium presents contemporary studies on the relevance for the social and related sciences. We will present qualitative and quantitative studies. We focus on studies relating to local and global social structures, change, and transitions. Im Kolloquium werden aktuelle empirische Studien mit Relevanz für die Sozialwissenschaften präsentiert und diskutiert. Dabei stehen verschiedene methodische Vorgehen ebenso wie die durch diese erworbenen Erkenntnisse im Fokus. Den thematischen Schwerpunkt bilden Studien zu sozialen Strukturen und sozialen Transitionen.

50729-01	Projekt: Training for Sustainability Research	6 KP
<b>Dozierende</b>	Paul Burger Marius Christen Patricia Holm <b>Frank Christian Krysiak</b>	
<b>Datum</b>	24.02.2020	
<b>Intervall</b>	unregelmässig	
<b>Angebotsmuster</b>	Jedes Frühjahrsemester.	

<b>Anbietende Organisationseinheit</b>	Departement Umweltwissenschaften
<b>Module</b>	Modul: Interdisziplinäre Forschung zu Nachhaltigkeit (Masterstudium: Sustainable Development)
<b>Lernziele</b>	Participants learn to work in an interdisciplinary group on a topic that is linked to sustainability research. They acquire practical knowledge regarding the interfaces between disciplines in sustainability research and methods for combining perspectives from different disciplines. In addition, participants expand their skills in team and project management.
<b>Inhalt</b>	Participants will work in small, interdisciplinary groups on pre-selected topics of sustainability research. Typically, the topics will be linked to on-going research projects of the research groups supervising this course. The group work will mainly build on existing studies; the student groups will assess and link scientific literature from the different disciplines and combine these studies to a consistent interdisciplinary review on a given topic. The emphasis is thus on combining disciplinary approaches.  To this end, participants will get both a joint supervision focusing on how to combine disciplinary approaches and a group-specific supervision focusing on the topic set for the group.
<b>Leistungsüberprüfung</b>	Lehrveranst.-begleitend
<b>Skala</b>	1-6 0,1
<b>Wiederholungsprüfung</b>	keine Wiederholungsprüfung

<b>Einsatz digitaler Medien</b>	kein spezifischer Einsatz
<b>Unterrichtssprache</b>	Englisch
<b>Teilnahmevoraussetzungen</b>	Exclusively for MSD students and those of the IJSD.
<b>Bemerkungen</b>	Mandatory for all students of MSD 2017. plenary sessions on: tba meeting 1: meeting 2: meeting 3: meeting 3: (incl. final presentations). Meetings in between with faculty representatives according to agreement.

50901-01	Seminar: Qualitative Data Analysis: Analyzing Text and Talk	3 KP
<b>Dozierende</b>	<b>Manfred Max Bergman</b>	
<b>Zeit und Ort</b>	Mo 09:15-16:00 Kollegienhaus	
<b>Datum</b>	17.02.2020	
<b>Intervall</b>	Block	
<b>Angebotsmuster</b>	unregelmässig	
<b>Anbietende Organisationseinheit</b>	Fachbereich Soziologie	
<b>Module</b>	Modul: Interdisziplinäre Forschung zu Nachhaltigkeit (Masterstudium: Sustainable Development) Modul: Methoden der Gesellschaftswissenschaften (Masterstudium: European Global Studies) Modul: Geographische Methoden- und Forschungskompetenz (MSF - Geographie) Modul: Erweiterung Gesellschaftswissenschaften M.A. (MSF - Politikwissenschaft) Modul: Methoden der Soziologie und der Gesellschaftswissenschaften: qualitativ (MSF - Soziologie)	
<b>Lernziele</b>	- Assess the suitability of specific research questions for different types of qualitative data analyses - Set up and perform qualitative data analyses on different types of non-numeric data - Understand the limits of qualitative data analysis - Present findings from qualitative data analysis orally and in written form	
<b>Inhalt</b>	This one-week intensive course covers introductory and advanced issues on how to analyze non-numeric data. While the primary focus is on the analysis of textual data, most of the covered methods and techniques are also applicable to audio and visual data. Examples of data suitable for qualitative analysis include interview transcripts, focus group recordings, print media, archival documents, government reports, corporate annual non-financial reports, blogs, meeting notes, diaries, photo collections, and social media posts. The first part of the course addresses the selection and preparation of non-numeric data for systematic qualitative analysis. The second part covers different groups of data analysis techniques. The	

third deals with quality concerns in qualitative data analysis, and the fourth with how to present and defend qualitative data analysis. The course will include examples and exercises that deal with different aspects of sustainability. The participants will work in groups on a small research project.

<b>Leistungsüberprüfung</b>	Lehrveranst.-begleitend
<b>Skala</b>	Pass / Fail
<b>Wiederholungsprüfung</b>	keine Wiederholungsprüfung
<b>An-/Abmeldung zur Prüfung</b>	Anmelden: Belegen; Abmelden: nicht erforderlich
<b>Hinweise zur Leistungsüberprüfung</b>	Regular attendance; required reading; project presentation (on Friday, the final day of the bloc): ppt presentation, written abstract of presentation; pass/fail
<b>Belegen bei Nichtbestehen</b>	beliebig wiederholbar
<b>Einsatz digitaler Medien</b>	kein spezifischer Einsatz
<b>Unterrichtssprache</b>	Englisch
<b>Teilnahmevoraussetzungen</b>	Limited number of participants (20). Previous experience in qualitative research methods.
<b>Bemerkungen</b>	Sociology and political science students have priority.

48955-01	Seminar: Tools and Methods of Natural Sciences Research	3 KP
<b>Zeit und Ort</b>	Mo 12:15-14:00 Vesalianum, Seminarraum (O2.02) Start of teaching: 24.02.20	
<b>Datum</b>	24.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	Jedes Frühjahrsem.	
<b>Anbietende Organisationseinheit</b>	Departement Umweltwissenschaften	
<b>Module</b>	Modul Wahlbereich Energie und Klimawandel (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul: Interdisziplinäre Forschung zu Nachhaltigkeit (Masterstudium: Sustainable Development)	
<b>Lernziele</b>	<p>The students</p> <ul style="list-style-type: none"> <li>- understand the difference between a scientific and a non-scientific approach to a question;</li> <li>- can formulate scientific hypotheses and can distinguish them from a question or idea;</li> <li>- and know about the difference between an observation and an experiment, induction and deduction, empiricism and rationalism, descriptive and experimental approaches.</li> </ul> <p>The students</p> <ul style="list-style-type: none"> <li>- understand the influence of observer, equipment, and experimental design on the outcome of an experiment;</li> <li>- know about sample sizes, research design, and error types;</li> <li>- understand the importance of positive / negative controls and standards.</li> </ul> <p>The students</p> <ul style="list-style-type: none"> <li>- know natural science methods that are important in the context of sustainability, such as molecular species identification, water quality parameters, behavioral assays, community assessments, assays for chemical contaminants, and others;</li> <li>- and know what kind of information these methods can provide and are aware of their limitations.</li> </ul>	
<b>Inhalt</b>	We will mix lectures, case studies, and self-organized work shadowing to gain knowledge about selected methods and approaches of the natural sciences. I. Adrian-Kalchhauser will provide input on the scientific method in general and on specific methods, occasionally with the help of guest speakers. In addition, students will collect methodological expertise during work shadowing and literature work. The seminar will focus on methods which are relevant for sustainable development topics.

<b>An-/Abmeldung zur Prüfung</b>	An-/Abmelden: Belegen resp. Stornieren der Belegung via MOnA	
<b>Hinweise zur Leistungsüberprüfung</b>	Oral presentation and practical work during field trip.	
<b>Belegen bei Nichtbestehen</b>	beliebig wiederholbar	
<b>Einsatz digitaler Medien</b>	kein spezifischer Einsatz	
<b>Unterrichtssprache</b>	Englisch	
<b>Teilnahmevoraussetzungen</b>	Special course application required for ALL (for details see "course application" or "Anmeldung"). Limited number of participants (19). Students of the MSD and those of the mentioned fields of study have priority (see list of modules; students of the bachelor's degree in Biology have been registered at least during 2 semesters in this field of study - incl. spring semester 20). If you study something different you must do a master's degree within the 'Faculty of Natural Science' and may participate in case of vacancies.  Further entry requirements for MSD students: MSD 2017 Students who have chosen the focus area in social sciences or in economics must have completed the 'Complementary Knowledge in Natural Sciences' module (incl. courses of	

spring semester 20).

#### MSD 2010

Die Studierenden mit den Studienvarianten Phil.-Hist. und WW haben die Grundlagen- und Aufbaubereiche Phil.-Nat. bis und mit FS 19 weitestgehend abgeschlossen, mindestens jedoch 12 KP für beide Module erworben (inkl. Belegungen vom FS 20).

#### Anmeldung zur Lehrveranstaltung

Mandatory application for ALL: Link for application open 19.02.20/19.00h to 15.03.20/ midnight:

[https://adam.unibas.ch/goto\\_adam\\_fold\\_744950.html](https://adam.unibas.ch/goto_adam_fold_744950.html)  
(Login on top row right hand side of ADAM website. The link is open as soon as the application form is online).

NOTE: Be aware of special entry requirements. Course inscription via MOnA remains mandatory.

In case of vacancies the mandatory online application link remains open until 15.03.20/ midnight.

#### Bemerkungen

Please note entry requirements and mandatory course application procedure (additional to registration on MOnA).

#### MSD 2017

For students with focus area in natural sciences the field trip is optional for the "Core Competences in Natural Sciences" module.

All students may transfer the credit points to the "Focal Areas in Sustainability Research" module (learning agreement).

#### MSD 2010

Studierende mit Studienvariante Phil.-Nat. können diese LV entweder im publizierten Wahlbereich oder im Vertiefungsbereich Phil.-Nat. anrechnen lassen (learning contract).

#### Schedule:

Preliminary meeting: 19.02.20 at 18.15h (aprox. 1 hour);

Preparation meeting of one day: date according to agreement.

field trip: Saturday, 20.06.20 (= latest arrival day) to Sunday, 28.06.20 (earliest departure day).

This field trip is offered by MSD. Prof. Dr. Patricia Holm is a member of the teaching committee MSD. Furthermore, she heads the research group Man-Society-Environment (Mensch-Gesellschaft-Umwelt MGU) and TQNE. Karen Bussmann holds a MSc in Biology (Major in Evolution and Ecology) and is doing her PhD within the research group MGU.

57244-01	Kolloquium: MSD Life Science	1 KP
<b>Dozierende</b>	<b>Patricia Holm</b>	
<b>Zeit und Ort</b>	Di 16:15-17:00 Vesalianum, Seminarraum (O2.02)	
<b>Datum</b>	25.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	einmalig	
<b>Anbietende Organisationseinheit</b>	Departement Umweltwissenschaften	
<b>Module</b>	Modul Wahlbereich Wasser (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul: Kernbereich Naturwissenschaften (Masterstudium: Sustainable Development)	
<b>Lernziele</b>	Die TeilnehmerInnen - üben und verbessern ihre Auftrittskompetenzen im Kontext einer Präsentation von wissenschaftlichen Daten; - üben und verbessern ihre Fähigkeiten wissenschaftliche Artikel kritisch zu diskutieren; - erwerben Wissen über aktuelle Themen, Ansätze und Methoden der wissenschaftlichen Nachhaltigkeitsforschung (aus Sicht der Naturwissenschaften). - Aktuelle Themen, wissenschaftliche Ansätze und neue Methoden in Ökologie und Nachhaltiger Entwicklung; - Präsentation und Diskussion eigener Forschungsprojekte (einschliesslich Masterarbeiten); - Präsentation und Diskussion von wichtigen, bahnbrechenden Publikationen.	
<b>Inhalt</b>		

<b>Literatur</b>	Literaturangaben werden während den einzelnen Kolloquiumsterminen gemacht.
<b>Leistungsüberprüfung</b>	Lehrveranst.-begleitend
<b>Skala</b>	Pass / Fail
<b>Wiederholungsprüfung</b>	keine Wiederholungsprüfung
<b>An-/Abmeldung zur Prüfung</b>	An-/Abmelden: Belegen resp. Stornieren der Belegung via MOnA
<b>Belegen bei Nichtbestehen</b>	nicht wiederholbar
<b>Einsatz digitaler Medien</b>	kein spezifischer Einsatz
<b>Unterrichtssprache</b>	Deutsch
<b>Teilnahmevoraussetzungen</b>	Für MSD-Studierende mit Studienvariante Phil.-Nat. Weitere Angaben zur Belegung und Anrechnung im MSD 2010, im MSD 2017 sowie für Doktorierende (siehe unter Bemerkungen). Belegen. Bitte melden Sie sich zudem direkt bei Prof. Dr. P. Holm. Anrechnung MSD 2010: Jene, die ihre Arbeit bei P. Holm schreiben, müssen das Kolloquium absolvieren. Allen anderen steht es frei, das Koll. zu absolvieren.
<b>Anmeldung zur Lehrveranstaltung</b>	Anrechnung MSD 2017
<b>Bemerkungen</b>	Pflichtveranstaltung für ALLE mit Studienvariante Phil.-Nat. (unabhängig davon, wie die Betreuung und Beurteilung der Masterarbeit geregelt sind). Der Entscheid zu welchem Zeitpunkt das Kolloquium belegt wird, erfolgt in Rücksprache mit Prof. Dr. P. Holm.  Weiter ist das Kolloquium für Doktorierende am MGU. Die Anrechnung der LV regeln sie in Rücksprache mit P. Holm.  Dies ist ein Angebot vom MSD. Prof. Dr. P. Holm ist Leiterin von MGU und vom TQNE sowie Mitglied der Unterrichtskommission MSD.

50264-01	Vorlesung mit Übungen: Global Change Ecology	3 KP
<b>Dozierende</b>	<b>Philipp Hirsch</b>	
<b>Zeit und Ort</b>	Mi 14:15-16:00 Vesalianum, Seminarraum (O2.02)	
<b>Datum</b>	26.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	Jedes Frühjahrsem.	
<b>Anbietende Organisationseinheit</b>	Departement Umweltwissenschaften	
<b>Module</b>	Modul: Kernbereich Naturwissenschaften (Masterstudium: Sustainable Development)	
<b>Lernziele</b>	The students - understand the ecological effects of global change in different ecosystems and can explain patterns and the underlying mechanisms; - can critically analyze existing research approaches and available data in the context of global change ecology; - can identify the interface between the approach of ecological sciences and other sciences to describe and understand global change; - understand the challenges of finding solutions to the negative effects of global change.	
<b>Inhalt</b>	We will treat the ecological relationships of global change following a hierarchical flow: going from basic food web effects to multiple trophic relationships, eventually including humans as recipients and agents of global change. Furthermore, we will frequently use aquatic ecosystems as case studies because they are disproportionately affected by global change and their ecosystem services are especially threatened and especially important to humans. Finally, we will consider global change beyond climate change and will treat land-use change, global transport and trade, change of human consumption patterns and pollution, global energy system change, species extinctions and invasions, and more.  Specific topics include (but are not limited to): 1) eco-evolutionary effects of land-use change and eutrophication, including a discussion of mitigation measures and socio-cultural effects; 2) ecological effects of earlier spring across multiple species in terrestrial food webs; 3) ecological effects and ecosystem service changes due to global species extinctions; 4) ecological and socio-economic effects of the global renewable energy development, including a discussion of future solutions; 5) human consumption patterns and ecological effects of microplastics pollution, including a discussion of the feasibility of existing solutions; 6) ecological and socio-economic effects and transdisciplinary management approaches of biological invasions, including a discussion of currently available management options.	

**The lecture**

- will be research-based. It will include specific case studies from the primary literature and will connect to current ongoing research;
- will also include application sections focusing on the discussion of existing solutions for mitigating the negative ecological effects of global change;
- will include specific local connections to the situation in Switzerland.

**Practical course:**

As a practical part each student will create a learning portfolio in parallel to the lecture. In this portfolio key questions raised in the lectures will be answered by students off class using own resources (e.g. literature research).

The portfolios will be collected and commented by peers and the lecturer. Based on this feedback the portfolios are developed as a complimentary resource to the lecture slides in preparation for the final written exam. The portfolios serve to practice the access to the course and exam content but will not be graded.

**Literatur**

Research articles as pdf-upload on ADAM will be supplied during the course.

**Leistungsüberprüfung**

Leistungsnachweis

**Skala**

1-6 0,1

**Wiederholungsprüfung**

eine Wiederholung, bester Versuch zählt

**An-/Abmeldung zur Prüfung**

An-/Abmelden: Belegen resp. Stornieren der Belegung via MOnA

**Hinweise zur Leistungsüberprüfung**

Regular attendance, readings, create a learning portfolio.

Written exam at the end of the semester: 27.05.20: 14.15 - 15.45h (location tba).

**Belegen bei Nichtbestehen**

beliebig wiederholbar

**Einsatz digitaler Medien**

kein spezifischer Einsatz

**Unterrichtssprache**

Englisch

**Teilnahmevoraussetzungen**

Non-MSD students must be studying a master's degree in the field of natural sciences.

**MSD 2017**

Students who have chosen the focus area in social sciences or in economics must have completed the 'Complementary Knowledge in Natural Sciences' module (at least 8 CP). Mandatory lecture for students with focus area in natural sciences. No transfer of CP to another module possible.

**Anmeldung zur Lehrveranstaltung**

Mandatory application for ALL: Link for application open from 15.01.20/noon - 05.02.20/ midnight:

[https://adam.unibas.ch/goto\\_adam\\_fold\\_744950.html](https://adam.unibas.ch/goto_adam_fold_744950.html)

(Login on top row right hand side of ADAM website. The link is open as soon as the application form is online).

NOTE: Be aware of special entry requirements. Course inscription via MOnA remains mandatory.

In case of vacancies the mandatory online application link remains open incl. the second week of teaching + 2 days.

Please note entry requirements and mandatory course application procedure (additional to registration on MOnA).

**MSD 2017**

Mandatory lecture for MSD students with focus area in natural sciences.

Students with focus area in social sciences or in economics transfer the credit points to the FASR module (learning agreement).

**MSD 2010**

Anrechnung für den Vertiefungsbereich Phil.-Nat. möglich (learning contract).

This lecture is offered by MSD. Dr. P. Hirsch is post doc staff member of Men-Society-Environment, Dep. Environmental Sciences, Faculty of Sciences.

<b>Zeit und Ort</b>	Pedro Batista Moritz Lehmann Fr 09:00-17:00 Geographie, Seminarraum EG 0-09 Vorbesprechung am Montag, 24.02.20 um 16:30 Uhr 13. März 20, 24. April 20 und 15. Mai 20 jeweils von 9:00-17:30 Uhr
<b>Datum</b>	24.02.2020
<b>Intervall</b>	unregelmässig
<b>Angebotsmuster</b>	Jedes Frühjahrsem.
<b>Anbietende Organisationseinheit</b>	Geowissenschaften
<b>Module</b>	Modul: Environmental Geosciences and Biogeochemistry (Masterstudium: Geowissenschaften) Modul: Kernbereich Naturwissenschaften (Masterstudium: Sustainable Development)
<b>Lernziele</b>	Das Verständnis für komplexe Fragestellungen in aktuellen Forschungsprojekten soll gefördert werden. Gleichzeitig werden die in vorausgegangenen Lehrveranstaltungen gelegten Grundkenntnisse in Biogeochemie, Bodenkunde und Isotopengeochemie vertieft. Die Dozierenden stellen Hintergründe, Fragestellung und Ergebnisse aus Forschungsprojekten und aktuellen Fragestellungen der Umweltgeowissenschaften und Biogeochemie vor. Dabei wird vor allem auf die Aufarbeitung der theoretischen Hintergründe wert gelegt. Daneben wird die Diskussion von Übertragbarkeit der Ergebnisse zwischen verschiedenen räumlichen Skalen oder auch die Bedeutung der Forschungsergebnisse in der Praxis eine Rolle spielen. Inhaltlich werden Beispiele aus der terrestrischen und aquatischen Biogeochemie, Bodenkunde und Isotopengeochemie behandelt.

43667-01	Seminar: Changing Individual Energy Behaviour - Approaches and Strategies	3 KP
<b>Dozierende</b>	<b>Paul Burger</b>	
<b>Zeit und Ort</b>	Di 10:15-12:00 Rosshofgasse (Schnitz), Sitzungsraum S 184 First teaching day: 25.02.2020!	
<b>Datum</b>	25.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	Jedes Frühjahrsem.	
<b>Anbietende Organisationseinheit</b>	Fachbereich Nachhaltigkeitsforschung	
<b>Module</b>	Modul Wahlbereich Energie und Klimawandel (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul: Kernbereich Gesellschaftswissenschaften (Masterstudium: Sustainable Development) Vertiefungsmodul Global Europe: Umwelt und Nachhaltigkeit (Masterstudium: European Global Studies) Modul: Resources and Sustainability (MSG - Changing Societies: Migration – Conflicts – Resources)	
<b>Lernziele</b>	The class will - learn on disciplinary approaches on changing individual energy behavior from economics, psychology, social sciences; - reveal the benefits and the necessity of an interdisciplinary approach to understand changes in individual energy behavior; - identify different governance strategies and levels of intervention to changing individual energy behavior.	
<b>Inhalt</b>	Transforming today's energy systems in industrialized countries includes a substantial reduction of the total energy consumption at the individual level. Selected instruments have been found to be effective in changing people's behavior in single domains, however,	

households seems to be quite inert in their energy consumption. The so far weak success story on reducing overall energy consumption indicates that our understanding of the determining factors of individual energy consumption as well as of its change is far from being conclusive. Thereby, households or individuals are not treated as energy consumers properly speaking but as consumer of energy services. This widens the horizon to also include people's („socially constructed“) wants.

We will introduce different disciplinary approaches in the field of changing individual energy behavior to clarify the diverging perceptions of the opportunities to change the behavior. Regarding economics, energy is often seen as a commodity and consumers will adapt usage in response to price signals. In psychological conceptions, energy use can be affected by stimulus-response mechanisms or by promoting environmental values. Sociology is often not looking at individuals but at practices displaying social meanings in relation to „materials“. Having revealed strengths and weaknesses of these approaches we will focus on an interdisciplinary frame integrating different perspectives on the change of individual energy behavior. Finally, we will further investigate and discuss the prospects and limitations of different governance/intervention strategies on multiple levels that are directed at changing individual energy behavior.

Special course application required for ALL (for details see 'course application' or 'Anmeldung'). Limited number of participants (25), Students of the MSD (incl. preparation semester), JDSD and those of the listed programs (see list of modules) have priority. If you study something different you must do a master's degree within the 'Faculty of Humanities and Social Sciences' and may attend the seminar in case of vacancies.

MSD 2017

MSD students who have chosen the focus area in natural sciences or in economics must have completed (or at least 8 CP) the "Complementary Knowledge in Social Sciences" module.

MSD 2010

Dieses Seminar ist im Wahlbereich Energie und Klimawandel/Bereich Phil.-Hist. publiziert. Studierende, welche die Grundlagen- und Aufbaubereiche Phil.-Hist. zu absolvieren haben, müssen diese bis und mit HS17 weitestgehend abgeschlossen haben.

#### **Anmeldung zur Lehrveranstaltung**

Mandatory application for ALL: Link for application open from 15.01.20/noon - 05.02.20/ midnight:

[https://adam.unibas.ch/goto\\_adam\\_fold\\_744950.html](https://adam.unibas.ch/goto_adam_fold_744950.html)  
(Login on top row right hand side of ADAM website. The link is open as soon as the application form is online).

NOTE: Be aware of special entry requirements. Course inscription via MOnA remains mandatory.

In case of vacancies the mandatory online application link remains open incl. the second week of teaching + 2 days.

#### **Bemerkungen**

Please note entry requirements and mandatory course application procedure (additional to registration on MOnA).

MSD 2017

For students with focus area in social sciences the seminar is optional for the "Core Competences in Social Sciences" module.

Students who have chosen the focus area in natural sciences or in economics must have completed the 'Complementary Knowledge in Social Sciences' module (at least 8 CP).

Transfer of credit points to the "Focal Areas in Sustainability Research" module (learning agreement) is possible for all students.

MSD 2010

Allgemein empfehlen wir den Studierenden im MSD 2010, LV aus dem Wahlbereich erst zu

belegen, wenn die KP aus den Grundlagen- und Aufbaubereichen weitestgehend erworben sind.

Dieses Seminar kann für den Vertiefungsbereich Phil.-Hist. angerechnet werden (learning contract).

This seminar is offered by MSD. Prof. Dr. Paul Burger is a member of the teaching committee MSD and head of the Sustainability Research Group, Dep. of Social Sciences, Faculty of Humanities and Social Sciences.

17403-01	Seminar: Governance, Sustainable Development and Democracy	3 KP
<b>Dozierende</b>	<b>Rony Emmenegger</b>	
<b>Zeit und Ort</b>	Mi 12:15-14:00 Rosshofgasse (Schnitz), Seminarraum S 01 First teaching day: 26.02.2020!	
<b>Datum</b>	26.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	Jedes Frühjahrsem.	
<b>Anbietende Organisationseinheit</b>	Fachbereich Nachhaltigkeitsforschung	
<b>Module</b>	Modul Aufbaubereich gesellschaftswissenschaftliche Fragen von Nachhaltigkeit (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul Kernbereich Gesellschaftswissenschaftliche Nachhaltigkeitsforschung (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul: Kernbereich Gesellschaftswissenschaften (Masterstudium: Sustainable Development) Modul: Komplementärer Basisbereich Gesellschaftswissenschaften (Masterstudium: Sustainable Development) Vertiefungsmodul Global Europe: Umwelt und Nachhaltigkeit (Masterstudium: European Global Studies) Modul: Fields: Governance and Politics (MSG - African Studies) Modul: Resources and Sustainability (MSG - Changing Societies: Migration – Conflicts – Resources)	
<b>Lernziele</b>	The participants - are familiar with the concepts 'governance', 'sustainable development' and 'democracy', they understand the interrelations and tensions between them; - have acquired basic theoretical, methodological and empirical knowledge and skills necessary to produce critically reflected scientific analyses of governance for sustainable development within various policy fields and political contexts.	
<b>Inhalt</b>	Against the backdrop of persistent problems of unsustainability, there is a lively debate both in politics and in science on how to govern societies towards more sustainable pathways. In conceptual terms this debate increasingly builds on the notion of 'governance' which highlights both theoretical limits to classical models of political steering and the empirical insight that governments are not the only relevant actors when it comes to the management of societal issues. Instead, at least within the context of modern democracies, the contested, interdependent and dynamic nature of contemporary policymaking has given rise to less hierarchical but more collaborative and polycentric forms of governance. Accordingly, for theoretical and empirical reasons, the governance of modern societies is more and more understood as a shared responsibility of the state, the market and the civil society.  This 'new governance complexity' is assumed to entail potentials and threats for sustainable development and democracy throwing up some fundamental questions regarding the relationship between all three concepts: How can societies be governed towards sustainable development in a democratic way? What are the normative and functional requirements of sustainability governance in democratic societies? What are the empirical conditions as well as prospects and barriers of democratic forms of governance for sustainable development within various political contexts? And, what are the implications of environmental change for the ways governance and democracy can be organized at and across spatial and temporal scales?  The seminar addresses the relationship between governance, sustainable development and democracy in theoretical and empirical respects. First, it will lay a theoretical fundament by introducing the concepts of governance, sustainable development and democracy. Second, specific approaches of governance for sustainable development will be critically discussed particularly with regard to their democratic implications. Third, a number of case studies of sustainability governance in different fields will provide an opportunity to analyze the democratic problem-solving capacity of different governance arrangements in various contexts. Finally, further theoretical and practical perspectives of democratic governance for sustainable development are sketched out.

<b>57243-01</b>	Seminar: Quality of Life and Sustainability: Theoretical and Empirical Approaches	3 KP
<b>Dozierende</b>	<b>Paul Burger</b>	
<b>Zeit und Ort</b>	Di 14:15-16:00 Alte Gewerbeschule, Seminarraum -159	
<b>Datum</b>	25.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	unregelmässig	
<b>Anbietende Organisationseinheit</b>	Fachbereich Nachhaltigkeitsforschung	
<b>Module</b>	Modul Kernbereich Gesellschaftswissenschaftliche Nachhaltigkeitsforschung (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul: Kernbereich Gesellschaftswissenschaften (Masterstudium: Sustainable Development) Modul: Resources and Sustainability (MSG - Changing Societies: Migration – Conflicts – Resources)	

<b>Lernziele</b>	<p>Students</p> <ul style="list-style-type: none"> <li>- will know different theoretical and empirical approaches to well-being</li> <li>- will know relations between well-being and sustainability (by looking at the debate on sustainable consumption)</li> <li>- are able to critically discuss claims regarding well-being and sustainability</li> </ul>
<b>Inhalt</b>	<p>Quality of Life and Sustainability: Theoretical and Empirical Approaches</p> <p>Sustainability is very often understood in terms of environmental protection („saving the planet“). Well-being or quality of life and the like are also very often conceived of as either something different from sustainability or even the opposite of sustainable development („we do not want to go back to the cave“) – at least in countries of the Global North. There are, however, very good reasons to deal with them as being inextricably linked with each other. The seminar will go along this line. We will first look at different theoretical approaches to well-being (or quality of life) following the hedonic (life satisfaction, happiness) and the eudaemonic (e.g. capabilities) tradition. Second, we will gain insights from ongoing empirical research on well-being that especially takes relations to consumption into account. Against that backdrop, we will consider literature related to change of consumption patterns („sustainable consumption“) to gain a better understanding on the relationship as well as on interesting research questions in that field.</p>

<b>Lernziele</b>	The students - understand 'sustainable development' as a new alternative role model within the global societal development discourse; - know important theoretical social sciences based approaches to analyze sustainability issues and to conceptualize the role model.	
<b>Inhalt</b>	Sustainable Development has become more and more influential since the famous Brundtland-report in shaping political, economic or individual decisions. However, it has also become a buzzword with many different meanings serving many different interests. Moreover, there are quite controversial theoretical approaches for conceptualizing sustainable development across different disciplines. Against this backdrop, this lecture provides a social science oriented basis for - understanding sustainable development as a new societal role model for human development; - conceptualizing sustainable development based on justice.

**Modul: Kernbereich Wirtschaftswissenschaften**

43498-01	Kolloquium: Psychological Theory in Consumer Behavior	6 KP
<b>Dozierende</b>	<b>C. Miguel Brendl</b>	
<b>Zeit und Ort</b>	Mi 14:15-18:00 Rosshofgasse (Schnitz), Sitzungsraum S 184	
<b>Datum</b>	19.02.2020	
<b>Intervall</b>	14-täglich	
<b>Angebotsmuster</b>	Jedes Frühjahrsemester.	
<b>Anbietende Organisationseinheit</b>	Wirtschaftswissenschaftliche Fakultät / WWZ	
<b>Module</b>	Modul: Kernbereich Wirtschaftswissenschaften (Masterstudium: Sustainable Development) Vertiefungsmodul: Marketing and Strategic Management (Masterstudium: Wirtschaftswissenschaften)	
<b>Lernziele</b>	<ul style="list-style-type: none"> <li>• Obtaining an overview of fundamental psychological concepts in preference formation and choice.</li> <li>• Learning about the nature of theory construction and theory testing by means of experiments (heavily emphasized).</li> </ul>	
<b>Inhalt</b>	<p>The course is appropriate for master's students in business, economics, or psychology, as well as for PhD students. You need to have either taken "Microeconomics and Psychology of Decision Making" or, if you are not a student of business/economics in Basel, an introductory psychology course.</p> <p>Although the course takes numerous applications from the academic field of consumer behavior, it focuses on general psychological theory. Specifically, it teaches you how to conduct research with a psychological/experimental orientation. For that reason it is a precondition for writing a master's thesis in behavioral marketing. But beyond that it is of particular interest if you want to explore what academic research is like.</p> <p>-For those without a prior degree in psychology the course offers a crash course in social and cognitive psychology as it relates to preferences (attitudes, feelings, evaluative judgments, choice).  -For those with a prior degree in psychology the course offers learning how to derive behavioral predictions from theories, as opposed to just describing theories. This skill goes beyond merely describing a theory and is important for anyone who wants to actually use a psychological theory.</p> <p>During the seminar we discuss your homework solutions to a set of exercises. From this discussion we draw inferences about theory itself and about designing experiments. The entire course is in English.</p>

<b>Leistungsüberprüfung</b>	Semesterendprüfung	
<b>Skala</b>	1-6 0,1	
<b>Wiederholungsprüfung</b>	keine Wiederholungsprüfung	
<b>An-/Abmeldung zur Prüfung</b>	Belegen via MOnA innerhalb der Belegfrist	
<b>Hinweise zur Leistungsüberprüfung</b>	Format of the Class Sessions  The core of class discussion is formed by the exercises. Every session your homework consists of readings and exercises that ask you to make predictions for an experiment. Every session I randomly draw some students to present their exercise solutions, which we then discuss. Given this format, it is necessary that you have completed the assigned readings and exercises before each session, and that you are present for each session.	
	<b>Grading:</b> The following components will contribute to your grade: 1. Your contributions to the class discussion. 2. The presentations you give for both, the exercises and the readings. 3. A detailed write-up of an exercise.	
<b>Belegen bei Nichtbestehen</b>	beliebig wiederholbar	
<b>Einsatz digitaler Medien</b>	kein spezifischer Einsatz	
<b>Unterrichtssprache</b>	Englisch	

**Teilnahmevoraussetzungen**

A maximum of 15 students can enroll. We will emphasize the following for admissions:

- Students for whom this course counts for their graduation will be favoured.
- Grades in the Kernfächer 31960 "Microeconomics and Psychology of Decision Making" and 12036 "Econometrics" or in equivalent courses if you come from another discipline.

**Anmeldung zur Lehrveranstaltung**

As the course is restricted to 15 students, please fill in the application form on the following link ([https://wwwunibas.eu.qualtrics.com/SE/?SID=SV\\_2c0DEuwNcPwZEv](https://wwwunibas.eu.qualtrics.com/SE/?SID=SV_2c0DEuwNcPwZEv)) by February 7th, 2020. As soon as you get admitted to the course (by February 16th), you should enrol in MOnA.

56949-01	+ Kolloquium: The Economics of Climate Change	3 KP
<b>Dozierende</b>	<b>Rebecca Lordan-Perret</b>	
<b>Zeit und Ort</b>	Di 12:15-14:00 Wirtschaftswissenschaftliche Fakultät, Seminarraum S14 HG.32	
<b>Datum</b>	18.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	Jedes Frühjahrsemester.	
<b>Anbietende Organisationseinheit</b>	Wirtschaftswissenschaftliche Fakultät / WWZ	
<b>Module</b>	Modul: Kernbereich Wirtschaftswissenschaften (Masterstudium: Sustainable Development) Modul: Wahlbereich (Masterstudium: Wirtschaftswissenschaften)	
<b>Lernziele</b>	Students will develop an understanding of how economists try to translate the physical impacts of climate change into economic costs using integrated assessment models. By the end of the course, students should have deep understanding of the implications of various modeling assumptions and valuation techniques that enable them to think critically about the useful applications and limitations of these models for policymaking.	
<b>Inhalt</b>	In this course, we focus on economic approaches to assessing climate change from a social welfare perspective. We begin with an overview of the scientific basis of climate change and its fundamental connection to economics. We then investigate the current methods used to price the externalities caused by greenhouse gas emissions, including methods to estimate the value of non-market goods (e.g., biodiversity and health) toward the estimation of the social cost of carbon. We discuss the intrinsic ethical meanings and implications of economic modeling choices; the sensitivity of economic results to functional form, underlying assumptions, and uncertainty; and the importance of economic results in informing climate policies globally.	
<b>Literatur</b>	To be distributed in class.

	Englisch
	For students in the MA Business and Economics: Completed Bachelor in Business and Economics. The further prerequisites are that at least one of the following courses has been taken: 14255 Advanced Environmental Economics (Krysiak) 29002 Elektrizitätsmärkte: Zwischen Regulierung und Wettbewerb (Weigt) 17691 International Trade, Resources and the Environment (Taylor)
	MSD-Students without a bachelor degree in economics/business and without focus area in economics are supposed to have completed the "Complementary Knowledge in Economics" module (MSD 2017) or „Grundlagen- und Aufbaubereiche Wirtschaftswissenschaften“ (MSD 2010, at least 6 of the required credit points being completed). MSD-students with focus area in economics are required to have taken at least one of the courses mentioned above for students in the MA Business and Economics.
	Students of MA Business and Economics or MSD will be allocated with the same priority that is higher than for students of other programs.
	More about the general prerequisites and the allocation process can be found here: <a href="https://wwz.unibas.ch/de/studium/master-business-and-economics/masterseminare/">https://wwz.unibas.ch/de/studium/master-business-and-economics/masterseminare/</a>

**Anmeldung zur Lehrveranstaltung**

The application for this seminar is done centrally and online from December 2, 2019 until January 6, 2020 with the Studiendekanat. The link to the online application form and more information can be found here: <https://wwz.unibas.ch/de/studium/master-business-and-economics/masterseminare/>

The registration is binding. In case of non-participation after registration it will be noted as "nicht erschienen" in the transcript. If you drop the course after having been assigned a topic, you will receive the grade "1.0".

<b>Datum</b>	20.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	Jedes Frühjahrsemester.	
<b>Anbietende Organisationseinheit</b>	Wirtschaftswissenschaftliche Fakultät / WWZ	
<b>Module</b>	Modul: Kernbereich Wirtschaftswissenschaften (Masterstudium: Sustainable Development) Spezialisierungsmodul: Areas of Specialization in International and/or Monetary Economics (Masterstudium: International and Monetary Economics) Vertiefungsmodul Global Europe: Handel und Unternehmen in der Globalisierung (Masterstudium: European Global Studies) Vertiefungsmodul Global Europe: Regional Integration and Global Flows (Masterstudium: European Global Studies) Vertiefungsmodul: International Trade, Growth and the Environment (Masterstudium: Wirtschaftswissenschaften)	
<b>Lernziele</b>	<p>Learning objectives:</p> <ol style="list-style-type: none"> <li>1. to know the scientific discussion in international trade and international business regarding "Globalization" and "Outsourcing",</li> <li>2. to understand the major contributions of the classical, neoclassical and new trade theories, and how these insights are used in the current literature,</li> <li>3. to get an understanding, how trade economists simplify international relationships in order to analyze and answer the questions posed above,</li> <li>4. to gain insight into the current research in international trade and business,</li> <li>5. to get to know and be able to apply concepts which allow international companies and international organizations to develop strategies which are important in practice.</li> </ol>	
<b>Inhalt</b>	Content: This course deals with the effects that arise from the globalization of markets. We derive challenges for economic policy and strategic management of international firms. International trade theory offers an excellent framework in this respect. We deal with questions such as: "Who gains and who loses from selective integration of markets?", "Which impacts arise from technological changes abroad and at home?", "Why do multinational firms exist and what strategies do or should they follow in different circumstances?", "How can we explain outsourcing and offshoring, what are the effects, how can international firms react?". The course not only provides answers to these questions, but also introduces the concepts which current research in international trade is based on and constantly is using. We present and discuss the fundamental contributions of the traditional and new trade theory, also referring to current research in the field; research has always been very dynamic in this field - theoretically and empirically. This requires that textbooks, papers in scientific journals as well as working papers on the graduate level are used in the course. One of the challenges of this course and of economics in general is to constantly ask in which way the insight can be useful for policy making and strategic management in companies. One or two guestlectures will be integrated in the course.	
<b>Literatur</b>	The relevant literature will be mentioned on the outline of the course. We will start with the foundation of international trade theory by David Ricardo in 1817 ("On Foreign Trade"), but also integrate most recent contributions from textbooks and articles published in international journals of economics and business. Papers will, whenever possible, be posted on ADAM in order that registered students in the course can easily download them from ADAM.

**Hinweise zur Leistungsüberprüfung**

How to attain the learning objectives:

Students should read the required reading in advance of each session. Some of this reading is very short. The required reading will be reduced to the minimum. However, I will sometimes go beyond this material and integrate further aspects into the lecture from the additional reading or the list of bibliography found at the end of this outline. I mention this list also as an aid for further reading and for writing a term paper for the Seminar in International Economics or the Master's thesis. Problems or questions will be solved by the students and/or discussed in class.

There will be a written final exam. I will give students the opportunity to earn additional grades for active participation in form of handing in short essays or assignments as well as short presentations during the term. These will have an announced weight in the final grade. Detailed information will be given at the beginning of the course as well as in the outline that should be available at the beginning of the term.

**Belegen bei Nichtbestehen

Teilnahmevoraussetzungen**

Date of Written exam:

beliebig wiederholbar  
kein spezifischer Einsatz  
Englisch

Prerequisites:

I expect that students have accomplished some courses in microeconomics on the BA level and that they have been confronted with a course or some material in International Trade or International Business on the BA level. The most important ingredient to the successful completion of the course is, however, the interest of students in topics of globalization and internationalization of firms and their willingness to read and regularly participate in class.

Registration: Please enrol in MOnA. EUCOR-Students and students of other Swiss Universities have to enrol at the students administration office (studseksupport1@unibas.ch) within the official enrolment period.

In 2020, I intend to use more time for discussions on company strategies and economic policy in the light of the new technological developments ("Digitization") and the determinants of innovation.

I also plan to give you the possibility to select extracts or individual chapters of recently published papers and books to present them towards the end of the class. Details will be made available at the beginning of the term.

<b>Datum</b>	17.02.2020
<b>Intervall</b>	wöchentlich
<b>Angebotsmuster</b>	Jedes Frühjahrsemester
<b>Anbietende Organisationseinheit</b>	Wirtschaftswissenschaftliche Fakultät / WWZ
<b>Module</b>	Grundlagenmodul: Advanced Topics in Economics (Masterstudium: International and Monetary Economics) Kernmodul: BWL (Masterstudium: Wirtschaftswissenschaften) (Pflicht) Modul Kernbereich Wirtschaftswissenschaften für Fortgeschrittene (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul: Ausgewählte Themen aus Ökonomie und Rechtswissenschaft (Masterstudium: Actuarial Science) Modul: Kernbereich Wirtschaftswissenschaften (Masterstudium: Sustainable Development) Modul: Methoden der Wirtschaftswissenschaften (Masterstudium: European Global Studies) Modul: Vorbereitung Masterarbeit Wirtschaftswissenschaften (Masterstudium: Sustainable Development)
<b>Lernziele</b>	<p>Game Theory:</p> <p>As Gibbons (1992, xi) puts it: "Game Theory is the study of multiperson decision problems. Such problems arise frequently in economics. As is widely appreciated, for example, oligopolies present multiperson problems – each firm must consider what the others will do. But many other applications of game theory arise in fields of economics other than industrial organization. At the micro level, models of trading processes (such as bargaining and auction models) involve game theory. At the intermediate level of aggregation, labor and financial economics include game-theoretic models of the behavior of a firm in its input markets (rather than its output market, as in an oligopoly). There are also multiperson problems within a firm: many workers may vie for one promotion; several divisions may compete for the corporation's investment capital. Finally, at a high level of aggregation, international economics includes models in which countries compete (or collude) in choosing tariffs and other trade policies, and macroeconomics includes models in which monetary authority and wage or price setters interact strategically to determine the effects of monetary policy." This course will introduce students to the main concepts and techniques of game-theoretic analysis. At its core lies the understanding of strategic interactions between deciding agents. The students will appreciate how to apply game-theoretic analysis to strategic settings.</p> <p>Theory of the Firm:</p> <p>Why do firms exist? Why are firms organized the way they are? Traditional economic models leave little room for firms or other organizations as they focus on market exchange between individuals.</p> <p>This course will introduce students to microeconomic models that try to explain the existence and structure of firms as we observe them in the real world. Economics brings a rigorous approach that is grounded in theory. The course will provide a basic understanding of economic approaches to modeling and understanding aspects of firms, their structure, the behavior they create, and how they differ from market interaction.</p> <p>About half of the course will be based on the standard textbook by Milgrom and Roberts, the other half will consist of influential articles on the economics of organizations, by authors such as Coase, Williamson, Hart, and Tirole.</p>
<b>Inhalt</b>	<p>Game Theory (first half of the semester):</p> <p>The course is divided into lecture hours and exercise hours. Problem sets will be available before every lecture hour and will be partly solved together in class.</p> <p>Block 1: Static Games of Complete Information:</p> <ul style="list-style-type: none"> <li>• Introduction, normal form, best response, dominant strategies, iterated elimination, Nash equilibrium</li> <li>• Mixed strategies</li> <li>• Proof of existence, multiple equilibria, refinements</li> </ul> <p>Block 2: Dynamic Games of Complete Information:</p> <ul style="list-style-type: none"> <li>• Extensive form, backwards induction</li> <li>• Subgame perfection, repeated games</li> <li>• Infinitely repeated games, bilateral bargaining</li> </ul> <p>Block 3: Static Games of Incomplete Information:</p> <ul style="list-style-type: none"> <li>• Bayesian games, Bayesian Nash Equilibrium</li> <li>• First-price auction, double auction</li> </ul> <p>Block 4: Dynamic Games of Complete and Incomplete Information:</p> <ul style="list-style-type: none"> <li>• Purification of mixed strategies, Perfect Bayesian Equilibrium</li> <li>• Signaling games</li> </ul> <p>Theory of the Firm (second half of the semester):</p> <p>Markets and Prices as Coordination and Incentive Devices</p> <ul style="list-style-type: none"> <li>• Transaction Costs</li> </ul>

- Efficiency Wages

**Literatur**

Literature part Game Theory:

The teaching program follows Robert Gibbon's book "Game Theory for Applied Economists", also known as "A Primer in Game Theory," (Princeton University Press, 1992). Slides for each lecture are uploaded to ADAM in advance.

Literature part Theory of the Firm:

The readings will consist of both scholarly research articles and chapters from the textbook, Economics, Organization and Management, by Paul Milgrom and John Roberts (1992, Prentice Hall). Both kinds of readings will be made available online.

<b>Lernziele</b>	see content	
<b>Inhalt</b>	This course investigates the linkages between international trade and the environment from both a theoretical and empirical viewpoint. It investigates the theoretical links between international trade and sustainability in two ways by studying the link between trade and resource use on the one hand and trade and industrial pollution on the other. It then reviews the empirical evidence linking trade to environmental outcomes using the theory as a guide to evaluate and critique the literature.	

<b>Literatur</b>	Some of the material covered are chapters in preparation for a new book "International Trade and Resource Use" and will be made available to students in pdf format. Most of it, however, is based on a selection of articles published in international journals.
<b>Weblink</b>	<a href="https://adam.unibas.ch">https://adam.unibas.ch</a>
<b>Leistungsüberprüfung</b>	Semesterendprüfung
<b>Skala</b>	1-6 0,1
<b>Wiederholungsprüfung</b>	keine Wiederholungsprüfung
<b>An-/Abmeldung zur Prüfung</b>	Anmelden: Belegen; Abmelden: Studiendekanat
<b>Hinweise zur Leistungsüberprüfung</b>	There will be one final exam and a paper requirement. The exam date will be established in the first lecture. The paper should be a critical analysis of a scholarly or popular article discussing some aspect of international trade's impact on the environment. The paper must use, at least implicitly, the tools and logic developed in the course.
	The date of the exam as well as the deadline of the paper will be posted and mentioned in the first class.
	Exam date:
	beliebig wiederholbar
<b>Belegen bei Nichtbestehen</b>	kein spezifischer Einsatz
<b>Einsatz digitaler Medien</b>	Englisch
<b>Unterrichtssprache</b>	Required:
<b>Teilnahmevoraussetzungen</b>	A good understanding of the principles of economics and of microeconomics.
	Recommended International Trade Theory, Environmental and Resource Economics
<b>Anmeldung zur Lehrveranstaltung</b>	Register in MOnA; Eucor students and exchange students contact the Registrar's Office at the Kollegiengebäude within the registration period. Registration = Enrollment for exam. You may unsubscribe by email to the Studiendekanat (studiendekanat-wwz@unibas.ch) until 9 May, 2020.
<b>Bemerkungen</b>	You should have a look at some of the literature discussed in class in advance of the course to be prepared for the course. The material will be accessible on ADAM approximately three weeks in advance of the start of the course. Students will be able to access the reading material after registration.
	The course is part of the "Guestprofessorships in Globalization - Internationalization of the Economy"

10616-01	Vorlesung: Machine Learning	3 KP
<b>Dozierende</b>	<b>Dietmar Maringer</b>	
<b>Zeit und Ort</b>	Do 14:15-18:00 Wirtschaftswissenschaftliche Fakultät, Grosses PC-Labor S18 HG.37

<b>Inhalt</b>	To counter-act the "data-rich, information-poor" ("drip") syndrome, this course covers concepts and techniques that aim at explorative analysis: finding structure within data, and, ideally, extracting information. These methods have their origins in areas such as machine learning, statistical learning, or data mining. These include (but are not limited to) non-linear regression methods, perceptrons and neural networks, support vector machines, tree-based methods, kernel-based methods, or rule-based methods. Typical applications are classification, prediction, clustering, or dimension reduction.	
<b>Literatur</b>	Theoretical presentations are complemented with hands-on examples using the software package R and relevant toolboxes. Furthermore, we will discuss issues such as data preprocessing and data management. T. Hastie, R. Tibshirani, J. Friedman, The Elements of Statistical Learning: Data Mining, Inference, and Prediction, 2nd ed., Springer 2009.

Finance part:

For each of the three subjects of the lecture, a package of slides is available. They are used in the lectures.

16036-01	Vorlesung: Microeometrics: Nonlinear Models and Statistical Learning	3 KP
<b>Dozierende</b>	<b>Christian Kleiber</b>	
<b>Zeit und Ort</b>	Di 14:15-16:00 Wirtschaftswissenschaftliche Fakultät, Seminarraum S14 HG.32	
<b>Datum</b>	18.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	Jedes Frühjahrsem.	
<b>Anbietende Organisationseinheit</b>	Wirtschaftswissenschaftliche Fakultät / WWZ	
<b>Module</b>	Modul: Kernbereich Wirtschaftswissenschaften (Masterstudium: Sustainable Development) Modul: Schadenversicherung (Masterstudium: Actuarial Science) Modul: Statistik und Computational Science (Masterstudium: Actuarial Science) Spezialisierungsmodul: Areas of Specialization in International and/or Monetary Economics (Masterstudium: International and Monetary Economics) Vertiefungsmodul: Marketing and Strategic Management (Masterstudium: Wirtschaftswissenschaften) Vertiefungsmodul: Quantitative Methods (Masterstudium: Wirtschaftswissenschaften)	
<b>Inhalt</b>	Introductory econometrics courses mainly cover the linear regression model, which is suitable for modelling response variables that may be considered as continuous. However, there are many practical situations where data are naturally discrete, e.g. binary or count data. The course will cover the classical nonlinear regression models for such data. It will use the framework of generalized linear models (GLMs), which provides a unified approach to models such as logit, probit and Poisson regression. Inference will be likelihood based.	

In addition, there will be an introduction to the recent literature on statistical learning (aka

machine learning), specifically to the notion of regularisation, with LASSO as the main example. If time permits there will also be a chapter on finite mixture models.

Empirical illustrations may include data from labor economics, health economics, or marketing, among further sources. The course will make use of the R language for statistical computing and graphics, hence basic knowledge of this software (including data import, running regressions) is expected.

All course materials are on OLAT.

NB.

(1) In order to make room for further (regression) models, there will at most be a brief review of likelihood methods. Participants are expected to be familiar with these methods at the level of the compulsory MSc level Econometrics course.

(2) The course was formerly offered under the title Microeconomics I. Many topics from that course will still be covered, however, there will be new topics from statistical learning. In order to make room for these, multinomial response models will no longer be covered. They will be included in a restructured course offered by K. Schmidheiny that was formerly called Microeconomics II.

Semesterendprüfung

1-6 0,1

keine Wiederholungsprüfung

Belegen via MOnA innerhalb der Belegfrist

Notes for the Assessment:

Written exam (date and duration TBA). Participants may bring (1) a dictionary, (2) a calculator (subject to the usual constraints), two DIN A4 pages (not 2 x 2!) of their own, HANDWRITTEN notes.

In addition, there will be at least two assignments, for which students may work in groups of two. Each assignment will account for 10% of the final grade.

written exam:

beliebig wiederholbar

kein spezifischer Einsatz

Englisch

Prerequisites:

Completed bachelor's degree (for students majoring in Business and Economics)

Introduction to Econometrics (for students from other departments: regression basics)

Econometrics [MSc] (for students from other departments: a second course in statistics, notably likelihood methods)

Registration: Please enrol in MOnA. EUCOR-Students and students of other Swiss Universities have to enrol at the students administration office (studseksupport1@unibas.ch) within the official enrolment period. Enrolment = Registration for the exam!

<b>Skala</b>	Pass / Fail
<b>Wiederholungsprüfung</b>	keine Wiederholungsprüfung
<b>An-/Abmeldung zur Prüfung</b>	An-/Abmelden: Belegen resp. Stornieren der Belegung via MOnA
<b>Hinweise zur Leistungsüberprüfung</b>	Presentations.
<b>Belegen bei Nichtbestehen</b>	nicht wiederholbar
<b>Einsatz digitaler Medien</b>	kein spezifischer Einsatz
<b>Unterrichtssprache</b>	Deutsch
<b>Teilnahmevoraussetzungen</b>	Only for MSD students with focus area in social science.
<b>Bemerkungen</b>	MSD 2010: Only for students with focus area in social sciences; mandatory for those writing a master's thesis within the SRG, voluntary for those, writing the thesis within a different research group. The colloquium can either be credited for the published module or for the specialization module in social sciences (Learning Contract).  MSD 2017: Mandatory for all students who have chosen the focus area in social sciences (credits are earned for the module "Preparation master's thesis in Social Sciences" (Learning Agreement).  This colloquium is offered by MSD. Prof. Dr. P. Burger is head of the Sustainability Research Group, Dep. Social Sciences, Faculty of Humanities and Social Sciences

49078-01	Kurs: Research Design Master's Thesis	3 KP
<b>Dozierende</b>	Paul Burger Patricia Holm <b>Frank Christian Krysiak</b>	
<b>Zeit und Ort</b>	Mo 08:15-10:00 Vesalianum Plenary meetings on: Mo, 24.02.20; Mo, 09.03.20. Third meeting tba.	
<b>Datum</b>	24.02.2020	
<b>Intervall</b>	unregelmässig	
<b>Angebotsmuster</b>	Jedes Semester	
<b>Anbietende Organisationseinheit</b>	Departement Umweltwissenschaften	
<b>Module</b>	Modul: Vorbereitung Masterarbeit Gesellschaftswissenschaften (Masterstudium: Sustainable Development) Modul: Vorbereitung Masterarbeit Wirtschaftswissenschaften (Masterstudium: Sustainable Development)	
<b>Lernziele</b>	The students - know how to prepare a research proposal for their master's thesis in a structured, systematic and scientific manner; - know to identify a valuable research topic in the field of sustainable development, to develop a related research question directed to a contribution to the scientific debate as well as designing a research approach (e.g. choice of methods) directed to answering the research question; - are able to characterize intersections between their approach and other disciplines as well as intersections to non-academic fields (such as politics, business etc.); - are familiar with formal requirements to a master's thesis (correct citation, presentation of graphs, figures, results, plagiarism etc.).	
<b>Inhalt</b>	Writing a master's thesis on a sustainability relevant topic is the masterpiece of the MSD study program. Students are expected to use productively their acquired knowledge (in terms of methods and sustainability related content) for analyzing a specific topic. However, developing a research design that copes with scientific scrutiny and accuracy is by far not an easy endeavour. Questions like 'How can I find an interesting topic?' or 'According to which criteria should I decide to go for a specific method?' or - and most important - 'Why and how do I have to link my research design to the ongoing scientific discourse?' are waiting to be	

answered.

This course is thought to support the students in developing in a structured, systematic and scientific manner their research proposal. Students get familiar with necessary elements of a master thesis (problem framing, introduction, background, aims, hypothesis, research questions, methods, results, discussion, reflection/contribution to the scientific debate etc. Students also learn how they can identify a valuable research topic in the field of sustainable development. Some elements are thereby generic, i.e. independent of a specific disciplinary perspective. Other elements are, to the contrary, highly dependent on the chosen disciplinary field. Still other elements are concerned with capturing intersections between the field.

Against this backdrop, the class will be jointly given by the three teachers at the beginning, when it comes to unfold the generic components. Subsequently the group will split into three groups and the students will develop their research proposal along the specific requirements according their own focus areas.

Exclusively for MSD students.

Mandatory course for all students of MSD 2017 ("Preparation Master's Thesis" module). Students with focus area in natural science have to list this course in the learning agreement for the "Preparation Master's Thesis" module. For details see guidelines and medium-term syllabus.

#### **Anmeldung zur Lehrveranstaltung**

Please register on MOnA as soon as possible (no additional course application).

#### **Bemerkungen**

Group meetings for all participants:

- meeting 1: 24.02.20/08.15 to 10.00h;
- meeting 2: 09.03.20/07.45 to 10.00h;
- meeting 3: tba.

Additional meetings according to agreements with responsible professors.

This course is offered by MSD: Prof. Dr. Patricia Holm, Paul Burger and Frank Krysiak (lead) are heading the MSD teaching committee.

50267-01	Seminar: Current Topics in Social Science Based on Sustainability Research	3 KP
<b>Dozierende</b>	<b>Annika Sohre</b>	
<b>Zeit und Ort</b>	Mo 10:15-12:00 Rosshofgasse (Schnitz), Sitzungsraum S 181	
<b>Datum</b>	24.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	unregelmässig	
<b>Anbietende Organisationseinheit</b>	Fachbereich Nachhaltigkeitsforschung	
<b>Module</b>	Modul Kernbereich Gesellschaftswissenschaftliche Nachhaltigkeitsforschung (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul: Vorbereitung Masterarbeit Gesellschaftswissenschaften (Masterstudium: Sustainable Development)	
<b>Lernziele</b>	By the end of the semester the participants will have acquired competencies and skills necessary to disclose current topics of social science based sustainability research. Specifically, they will know how to set up systematic search strategies to find and delimitate relevant and current topics; how to elaborate the state of discussion in a given field; and how to specify knowledge gaps. Furthermore, they will learn how to summarize debates about current sustainability issues.	
<b>Inhalt</b>	Sustainability research in the social sciences is a rapidly developing field that covers a broad range of debates within and across various disciplines and problem areas. This poses a huge challenge to keep track of "what is going on?", to filter interesting topics and cope with the complexity of different contributions. Furthermore, there is a growing demand for social scientists to improve science communication, that is, condensing scientific results to	

comprehensible information, e.g. in the state-of-the-art section of a master thesis.  
 In a lab setting, the students will systematically identify and engage with a current topic of social science-based sustainability research based on the method of systematic literature reviews. The students:

- search and select current topics, and they further elaborate these topics in literature reviews;
- discuss empirical, theoretical, methodological and practical issues concerning current topics;
- present and discuss the developed topics orally and in written form.

Special course application required for ALL (for details see 'course application' or 'Anmeldung'). Limited number of participants (20); students of the MSD and IJDSD have priority. If you study something different you must do a master's degree within the 'Faculty of Humanities and Social Sciences' and may attend the seminar in case of vacancies.

**MSD 2017**

Students who have chosen the focus area in natural sciences or in economics must have completed the 'Complementary Knowledge in Social Sciences' module (at least 8 CP).

**Anmeldung zur Lehrveranstaltung**

Mandatory application for ALL! Link open from 15.01.20/noon - 05.02.20/midnight:

[https://adam.unibas.ch/goto\\_adam\\_fold\\_744950.html](https://adam.unibas.ch/goto_adam_fold_744950.html)

(Login on top row right hand side of ADAM website; list of forms available when link is open)

NOTE: Be aware of special entry requirements. Course inscription via MOnA remains mandatory for all participants.

In case of vacancies the online application link remains open until the second week of teaching + 2 days.

**Bemerkungen**

Please note entry requirements and mandatory course application procedure (additional to registration on MOnA).

**MSD 2017**

For students with focus area in social sciences (MSD 2017) the seminar is mandatory for the published module.

Transfer of credit points to the FASR module (learning agreement) is only possible for those, who have chosen the focus area in natural sciences or in economics.

**MSD 2010**

Für Studierende mit Studienvariante Phil.-Hist. (MSD 2010) ist dieses Seminar frei wählbar und kann für den Vertiefungsbereich angerechnet werden (learning contract).

This seminar is offered by MSD. Dr. A. Sohre is post doc staff member of the Sustainability Research Group, Dep. of Social Sciences, Faculty of Humanities and Social Sciences.

46737-01	Seminar: Experimental Research Methods in Social Science	3 KP
<b>Dozierende</b>	Ilijana Schubert	
<b>Zeit und Ort</b>	Do 10:15-14:00 First teaching day: 27.02.2020!

The seminar is eligible for all MSD students. Students who have chosen the focus area in natural sciences or in economics must have completed the 'Complementary Knowledge in Social Sciences' module (at least 8 CP), the CP are transferred to the FASR module (learning agreement).          For the students with focus area in social science it's mandatory to attend one class in methods, see information in the medium-term syllabus (if they attend this seminar on a voluntary base, they can accredit the CP either for the published module or for the FASR module).</p>
<b>Bemerkungen</b>	

Anrechnung MSD 2010

Dieses Seminar ist im Modul Kernbereich Gesellschaftswissenschaftliche Nachhaltigkeitsforschung publiziert und kann nach Rücksprache mit P. Burger mittels LC für den Vertiefungsbereich Phil.-Hist. angerechnet werden.

This seminar is offered by MSD. Dr. Iljana Schubert is a post doc staff member of the Sustainability Research Group, Dep. Social Sciences, Faculty of Humanities and Social Sciences.

33426-01	Seminar: Quantitative Data Analysis in African Studies	3 KP
<b>Dozierende</b>	<b>Elisio Macamo</b>	
<b>Zeit und Ort</b>	Mi 10:00-12:00 Alte Universität, Seminarraum -201	
<b>Datum</b>	19.02.2020	
<b>Intervall</b>	wöchentlich	
<b>Angebotsmuster</b>	Jedes Frühjahrsem.	
<b>Anbietende Organisationseinheit</b>	Zentrum für Afrikastudien	
<b>Module</b>	Modul: Methoden der Gesellschaftswissenschaften (Masterstudium: European Global Studies) Modul: Vorbereitung Masterarbeit Gesellschaftswissenschaften (Masterstudium: Sustainable Development) Modul: Empirische Forschungsmethoden der Politikwissenschaft und der Gesellschaftswissenschaften (MSF - Politikwissenschaft) Modul: Methoden der Soziologie und der Gesellschaftswissenschaften: quantitativ (MSF - Soziologie) Modul: Research Skills (MSG - African Studies) Modul: Transfer: Europa interdisziplinär (MSG - Europäische Geschichte in globaler Perspektive)	
<b>Lernziele</b>	Students know - that "analysis" is above all an exercise in argumentation; - how to identify the logical structure of explanations in quantitative analysis; - how basic argument forms such as comparison and representativeness can be deployed in analysis; - how to avoid the pitfalls of faulty reasoning such as in "cause and effect", "ignoring evidence" and "anticipation"; - how to deploy quantitative analytic tools in the context of Africa.	
<b>Inhalt</b>	The aim of this course is to improve participants' ability to read and critically engage with quantitative research reports. It assumes no advanced knowledge of mathematics and does not expect participants to be familiar with advanced statistical methods. The course will introduce participants to the logic of quantitative analysis by exploring fundamental aspects of the logic underlying it and in this way improving participants' own analytical and critical skills. In preparation for the course, participants are required to not only read the recommended literature, but also identify a quantitative research report (article, book chapter, etc.), which they are expected to critically evaluate as part of their own evaluation for the course.

<b>Datum</b>	17.02.2020	
<b>Interval</b>	wöchentlich	
<b>Angebotsmuster</b>	Jedes Frühjahrsemester.	
<b>Anbietende Organisationseinheit</b>	Wirtschaftswissenschaftliche Fakultät / WWZ	
<b>Module</b>	Grundlagenmodul: Advanced Topics in Economics (Masterstudium: International and Monetary Economics) Kernmodul: BWL (Masterstudium: Wirtschaftswissenschaften) (Pflicht) Modul Kernbereich Wirtschaftswissenschaften für Fortgeschrittene (Masterstudium: Sustainable Development (Studienbeginn vor 01.08.2017)) Modul: Ausgewählte Themen aus Ökonomie und Rechtswissenschaft (Masterstudium: Actuarial Science) Modul: Kernbereich Wirtschaftswissenschaften (Masterstudium: Sustainable Development) Modul: Methoden der Wirtschaftswissenschaften (Masterstudium: European Global Studies) Modul: Vorbereitung Masterarbeit Wirtschaftswissenschaften (Masterstudium: Sustainable Development) Game Theory: As Gibbons (1992, xi) puts it: "Game Theory is the study of multiperson decision problems. Such problems arise frequently in economics. As is widely appreciated, for example, oligopolies present multiperson problems – each firm must consider what the others will do. But many other applications of game theory arise in fields of economics other than industrial organization. At the micro level, models of trading processes (such as bargaining and auction models) involve game theory. At the intermediate level of aggregation, labor and financial economics include game-theoretic models of the behavior of a firm in its input markets (rather than its output market, as in an oligopoly). There are also multiperson problems within a firm: many workers may vie for one promotion; several divisions may compete for the corporation's investment capital. Finally, at a high level of aggregation, international economics includes models in which countries compete (or collude) in choosing tariffs and other trade policies, and macroeconomics includes models in which monetary authority and wage or price setters interact strategically to determine the effects of monetary policy." This course will introduce students to the main concepts and techniques of game-theoretic analysis. At its core lies the understanding of strategic interactions between deciding agents. The students will appreciate how to apply game-theoretic analysis to strategic settings.  Theory of the Firm: Why do firms exist? Why are firms organized the way they are? Traditional economic models leave little room for firms or other organizations as they focus on market exchange between individuals. This course will introduce students to microeconomic models that try to explain the existence and structure of firms as we observe them in the real world. Economics brings a rigorous approach that is grounded in theory. The course will provide a basic understanding of economic approaches to modeling and understanding aspects of firms, their structure, the behavior they create, and how they differ from market interaction. About half of the course will be based on the standard textbook by Milgrom and Roberts, the other half will consist of influential articles on the economics of organizations, by authors	
<b>Lernziele</b>		

such as Coase, Williamson, Hart, and Tirole.

#### **Inhalt**

Game Theory (first half of the semester):

The course is divided into lecture hours and exercise hours. Problem sets will be available before every lecture hour and will be partly solved together in class.

Block 1: Static Games of Complete Information:

- Introduction, normal form, best response, dominant strategies, iterated elimination, Nash equilibrium
- Mixed strategies
- Proof of existence, multiple equilibria, refinements

Block 2: Dynamic Games of Complete Information:

- Extensive form, backwards induction
- Subgame perfection, repeated games
- Infinitely repeated games, bilateral bargaining

Block 3: Static Games of Incomplete Information:

- Bayesian games, Bayesian Nash Equilibrium
- First-price auction, double auction

Block 4: Dynamic Games of Complete and Incomplete Information:

- Purification of mixed strategies, Perfect Bayesian Equilibrium
- Signaling games

Theory of the Firm (second half of the semester):

Markets and Prices as Coordination and Incentive Devices

- Transaction Costs
- Team Production
- Asymmetric Information
- Principal-Agent Theory
- Signaling
- Efficiency Wages

#### **Literatur**

Literature part Game Theory:

The teaching program follows Robert Gibbon's book "Game Theory for Applied Economists", also known as "A Primer in Game Theory," (Princeton University Press, 1992). Slides for each lecture are uploaded to ADAM in advance.

Literature part Theory of the Firm:

The readings will consist of both scholarly research articles and chapters from the textbook, Economics, Organization and Management, by Paul Milgrom and John Roberts (1992, Prentice Hall). Both kinds of readings will be made available online.
